Training

Cipher Schools — Full-Stack Developer Trainee (Summer Training) **Jun 2025 – Jul 2025**

- Completed intensive full-stack development training focused on the MERN stack (MongoDB, Express.js, React.js, Node.js) through the team project "Happy Meal."
- Developed and integrated RESTful APIs, CRUD operations, JWT-based authentication, and Gemini API features while building a full-stack AI-powered recipe generator with teammates.
- Implemented secure user authentication and authorization to enhance application security and access control. Strengthened practical skills in full-stack development, API integration, database management, and secure authentication, contributing to improved application performance and recommendation accuracy.
