Projects

Quantum Code | MERN Stack, Judge0 API, WebSockets

Oct 2025 – Nov 2025

- Engineered a high-performance coding practice platform using the MERN stack to facilitate seamless real-time code execution.
- Integrated the **Judge0 API**, **Socket.io** for live duels, and **Redis** to significantly optimize data retrieval speeds.
- Boosted user engagement by **70%** and reduced database query latency by **40%** through advanced caching strategies.

HappyMeal – AI-Powered Recipe Generator | MERN, Gemini API, JWT

Jun 2025 – Jul 2025

- Engineered an AI-driven full-stack application using the MERN stack to generate personalized recipes and insights.
- Integrated the **Gemini API** for meal suggestions and **JWT** for security.
- Improved recommendation accuracy by **40%** and optimized **RESTful API** data flow for faster user response times.

Training

Cipher Schools — Full-Stack Developer Trainee (Summer Training)

Jun 2025 – Jul 2025

- Completed intensive full-stack development training focused on the MERN stack (MongoDB, Express.js, React.js, Node.js) through the team project “Happy Meal.”
- Developed and integrated RESTful APIs, CRUD operations, JWT-based authentication, and Gemini API features while building a full-stack AI-powered recipe generator with teammates.
- Implemented secure user authentication and authorization to enhance application security and access control. Strengthened practical skills in full-stack development, API integration, database management, and secure authentication, contributing to improved application performance and recommendation accuracy.
